

Sustainability Alignment Workshops for “Green Teams”

ALIGN GREEN TEAM INITIATIVES WITH YOUR ORGANIZATION’S STRATEGIC SUSTAINABILITY GOALS

Do you know what sustainability measures your Green Teams are pursuing?

Are they working off of a prioritized list?

How are their efforts being measured?

GREEN TEAMS ARE AN ORGANIZATIONAL ASSET IF THEIR SUSTAINABILITY GOALS ARE ALIGNED

Harness the passion, commitment and efforts of Green Teams to effect impactful sustainability measures at your organization. Align their efforts with the organization’s sustainability goals to organize, prioritize and to successfully measure positive impacts from sustainability initiatives deployed.

EMPOWER YOUR GREEN TEAMS BY BUILDING THEIR SUSTAINABILITY KNOWLEDGE

TripleWin Advisory offers thoughtfully-crafted, highly interactive Green Team workshops designed to impart foundational knowledge to internal green team groups on the best approaches for pursuing corporate sustainability initiatives with high impact. Our workshops educate Green Teams on how to think about sustainability through a corporate value chain lens; highlighting the intervention points within a corporate ‘system’ using a framework that maps sustainability measures from easy-to-implement to more challenging, and from no cost to investment-driven.

Our sustainability alignment workshops do just that for companies and their green teams: align internal teams and groups around a prioritized set of initiatives in order to take effective action to meet defined organizational sustainability goals and to measure progress made.

SCHEDULE YOUR GREEN TEAM WORKSHOPS TODAY!
