

# Employee Engagement Workshops

## Build the 'Sustainability Muscle' of Your Employees

Organizations that take corporate sustainability seriously are equally committed to progressing the sustainability knowledge of their employees.

Support your employee's capacity-building around sustainability measures they can employ in their own lives.

Provide them with the frameworks and tools needed to implement personal sustainability measures successfully.

Empower them to be sustainability power players in their own lives!

### PLANT A SUSTAINABILITY SEED WITHIN EVERY EMPLOYEE

TripleWin Advisory offers thoughtfully-crafted, highly interactive employee sustainability workshops designed to empower individuals to confidently pursue sustainability measures that align with their personal values.

Participants gain a quick primer on the drivers of climate change and learn how a personal carbon footprint can guide action-taking. Personal value preferences are discussed as well as the principles of behavior change-making.

**Workshop outcomes:** Individualized sustainability roadmaps are developed. Participants leave with customized action plans for implementing sustainability measures in their lives based on TripleWin's small-medium-large sustainability framework.

TripleWin's employee sustainability workshops are executed in a series that progressively builds participants' understanding of sustainability, their confidence in and capabilities to affect meaningful change in their lives.

**Workshop goal:** Employees view sustainability as doable, measurable, meaningful and life-affirming.

### SUSTAINABILITY WORKSHOP DETAILS:

- Includes a series of five, executed sequentially.
- Each workshop is 60-90 minutes in length.
- Delivery can be conducted in-person or virtually.
- Can accommodate up to 50 individuals per workshop.
- Workshop rates range between \$100-150 per person.\*
