

## CONSULTING

TripleWin offers a set of "tools" to help businesses progress their corporate sustainability journeys.

### CLIMATE DISCLOSURES

We are knowledgeable climate disclosure experts who support a diverse set of small- and medium-cap businesses both privately-held and publicly-traded. Our expertise is translating carbon speak into business language that is clear, informative, and actionable.

### CARBON INVENTORIES

We make baselining your company's emissions a strategic business opportunity, not solely a reporting exercise. TripleWin conducts comprehensive carbon inventories, managing every aspect of data collection and normalization, carbon calculation, and data visualization to ensure the completion of accurate, transparent and auditable carbon inventories.

### CLIMATE ANALYSES & NET ZERO SCENARIO PLANNING

Privately-held and publicly-traded companies realize the need to align their sustainability goals to those of the Paris Climate Accord. TripleWin works with companies to set carbon, waste, water and energy reduction targets as well as to perform climate analyses on how companies' supply chains and global operations will be affected by climate change impacts.

### CIRCULAR BUSINESS MODELING

TripleWin doesn't just espouse business circularity to clients, we research the most viable path to it, recommend optimal solutions, and develop financial business cases to prove implementation is value-creating.

### SUSTAINABILITY ROADMAPS

TripleWin builds business-aligned and goal-oriented sustainability roadmaps that allow companies to proactively and effectively communicate their ESG strategies.

### MATERIALITY ASSESSMENTS

TripleWin envisions companies creating value for a diverse set of stakeholders. We work with companies to uncover, articulate and prioritize the critical material issues to pursue within their ESG strategies.

### WASTE AUDITS

TripleWin works with manufacturers to implement audits of their manufacturing facilities, line operations and processes to uncover opportunities to optimize food loss.

## EDUCATING

TripleWin helps companies expand the scope of their sustainability initiatives and amplify their impact through employee engagement and education tools.

### COURSES

When your company has made sustainability strategic and embedded it into its organizational ethos, TripleWin supports the building of that sustainability 'DNA' by crafting evergreen training courses to be incorporated into company's learning management systems.

### PROFESSIONAL DEVELOPMENT SUSTAINABILITY COURSE

We want organizations to embrace sustainable living among their employees. The UN includes 'sustainability lifestyles' as a universal goal to be achieved by 2030. TripleWin has developed an 'off-the-shelf' sustainability course that is a comprehensive guide for doing just that. Call it the Next-Gen employee benefit.

### CUSTOM DEVELOPED ESG GOAL-ALIGNED COURSES

For organizations that have set and publicly-communicated their strategic ESG goals, the next course of action is to align your workforce around them. TripleWin custom develops under-an-hour courses that train your employees on the importance of key goals and how to ensure organizational success in reaching them.

### EMPLOYEE ENGAGEMENT

Is your company looking to build internal alignment on key priority ESG goals among your employees as well as to ensure that everyone is equipped with the same foundational knowledge? TripleWin builds customizable, interactive and highly memorable employee engagement assets that can be replicated across your global operations.

### TRAINING VIDEOS

TripleWin builds interactive, clever animated videos that use humor and the unexpected to get and hold the attention of your workforce.

### COMPETITION CHALLENGES

We are creative thinkers who like to customize our interactive experiences to our clients' delight. One of the best ways we know how to engage employees in sustainability action-taking is to develop competitions deployed at the workplace.

### GEMBA WALKS

TripleWin uses this 'continuous improvement' tool to engage employees in identifying ways to eliminate waste at the source.

## ADVISING

TripleWin raises the importance of corporate sustainability with corporate boards, both public and private, and makes the business case to pursue.

### INVESTMENT FIRMS

TripleWin partners with global investment firms to advise on industry and sustainability trends, inform on proposed and impending climate legislation, work with investment teams to guide their sustainability due diligence, and run educational seminars and workshops to address timely ESG and climate change issues pertinent to their investments.

### BOARDS

Boards need to know what is material to the corporations they oversee; how well management is mitigating climate risks and attendant reputational damage; and how to provide effective oversight of strategic sustainability initiatives. TripleWin delivers incisive presentations and advice to Boards and Directors on a wide-range of ESG topics.

### PORTFOLIO COMPANIES

For VC- and PE-backed, high-growth and pre-IPO companies, TripleWin serves as a partner and strategic resource on topics, issues, policies and initiatives to progress and showcase their commitments to corporate sustainability that are business-aligned, strategic and value-adding.

### BUSINESS TRANSFORMATION

TripleWin applies the tools of MIT's Presencing Institute to engage corporations and executive management teams in a journey of business awareness, systemic failures and economic externalities driving climate change, and facilitates wholly new thought patterns and bold ideas of how to operate that are intended to transform the system of how businesses operate, manufacturer, and manage their products and materials.
